

**UNFCCC technical workshop on water and climate change impacts and adaptation strategies under the Nairobi work programme on impacts, vulnerability and adaptation to climate change**  
18.20 July 2012, Mexico City, Mexico

**Session 3: Assessment of climate change impacts on water resources, and on related sectors and ecosystems**

# **Assessment of climate change impacts on water resources, and on related sectors and ecosystems**

- 1. Climate change impacts on water resources, including multi-dimensional aspects of water in context of livelihood, related sectors and ecosystems.**
- 2. Applicability, availability and dissemination of tools and methods including indigenous and traditional knowledge and practices, gender-sensitive tools and methods and approaches for impact and vulnerability assessment at subnational, national and transboundary levels**
- 3. Lessons learned (good practices, gaps and needs)**

1. How is climate change impacting on water resources and on related sectors and ecosystems? What are the multidimensional aspects of water affecting lives and livelihoods?
2. How could modern, indigenous and traditional knowledge with gender perspective inspire crosscutting tools for assessing climate change impact on water resources?
3. What are the lessons learned, including good practices, gaps and needs?
